Custom Machining | Fabrication | Engineering Support

MANUFACTURING

We Help Utility Contractors & Engineers Get It Done Right

IFL Manufacturing works with companies in the electrical industry to deliver custom parts and components—on time, built to spec, and supported from design to delivery

Capabilities:

- Machining & Fabrication
- Engineering Support
- Prototype to Production
- Special Projects

Industries Served

- Electric Utilities
- Substation Construction
- Rail & Transit Electrification
- Power Generation

Featured Utility Projects

- URD Quick Service Restore Cart

Pedestal-to-meter socket mobile unit for temporary underground service restoration.

- Custom Solid Lugs

Designed and machined solid copper and aluminum lugs for transformers, substations, and switchgear – any size, any material, any plating.

- Ferroresonance Heater Assembly

Currently developing a resistive heating component to mitigate the ferroresonance phenomenon in underground distribution.

- Underground Transmission Dead-End Caps

Machined end caps for high-voltage cable termination and protection in buried transmission lines.
